

Florida Society of Interventional Pain Physicians

FSIPP ANNUAL MEETING & TRADESHOW

May 21 - 23, 2010 Gaylord Palms Resort

FSIPP is THE voice for interventional pain physicians. We continue to advocate for the health of your patients and your profession. FSIPP was a leader in getting the Prescription Drug Monitoring Legislation passed in Florida. We continue to educate payors regarding the procedures we perform as well as continue to advocate for your reimbursement for these procedures. We need to get together, network, communicate, and realize our strength in numbers.

FSIPP has brought national and world experts in the field of IPM. A portion of the program is described below. Stay tuned for further details.
Thank You.
